SOUTHWEST GEORGIA | FLORIDA PANHANDLE | SOUTHEAST ALABAMA

Practical ambulatory care for the individual horse, owner, and farm

WELLNESS | DENTISTRY | MEDICAL CARE | LAMENESS | EMERGENCIES

Field procedures | Diagnostics | Coggins | Travel papers | End-of-life care

WELLNESS & PREVENTIVE CARE

- Annual wellness examinations and individualized vaccination programs
- Fecal testing, deworming plans, parasite monitoring, and biosecurity
- Nutrition, body-condition, weight-loss, and husbandry consultation
- Routine bloodwork, laboratory testing, and preventive-health planning

DENTAL & ORAL CARE

- Routine oral examinations and dental floating
- Evaluation of dropping feed, difficulty chewing, and weight loss
- Identification of sharp points, hooks, fractured teeth, and oral disease
- Sedation and dental procedures appropriate for ambulatory care

MEDICAL & GERIATRIC CARE

- Fever, poor appetite, lethargy, respiratory disease, and GI illness
- Endocrine, skin, allergic, and chronic-disease evaluation/management
- Eye examinations, ocular treatment, and neurologic evaluation
- Geriatric-horse assessment, weight management, and quality-of-life care

LAMENESS & PERFORMANCE

- General lameness examinations and gait evaluation
- Hoof, lower-limb, acute, and chronic lameness assessment
- Evaluation of poor performance, stiffness, and reluctance to move
- Coordination with farriers and referral when advanced diagnostics are needed

URGENT & EMERGENCY CARE

- Colic evaluation, nasogastric intubation, fluids, and initial management
- Choke evaluation and treatment
- Eye injuries, acute lameness, wounds, trauma, and allergic reactions
- Emergency and after-hours farm calls when available

PROCEDURES, DIAGNOSTICS & TRAVEL

- Routine castration, wound care, laceration repair, and field sedation
- Blood, fecal, and tissue collection with diagnostic-lab submission
- Coggins testing, health certificates, show, and interstate travel papers
- End-of-life consultation, quality-of-life assessment, and humane euthanasia
